Introduction

D2.3: Project website and Social Media sites contains information on SOPs4RI's website (<http://sops4ri.eu/>) and its social media sites (Facebook, Twitter and LinkedIn pages). SOPs4RI's website acts as a hub, where all online dissemination channels converge. Facebook, Twitter and LinkedIn pages of the project can easily be reached through the front page of the website. Additionally, the Twitter account has an active window at the bottom of the front page, where the activities of SOPs4RI and other projects is visible.

NTUA started designing the website and created all Social Media sites even before the official start of the project, in close collaboration with the project's coordinators. The non-public version of the website was presented at SOPs4RI's kick-off meeting in January, where all consortium partners commented on the different elements of the website (i.e. content, design, and aesthetics). NTUA implemented all needed amendments. The design and aesthetics of the Social Media sites are for branding purposes adjusted to and in line with the website.

SOPs4RI's website was launched on the 24th of February 2019.

Technical specifications

SOPs4RI's website is launched through an Ubuntu-server running Apache2 + PHP 7.2 + MySQL, situated at Aarhus University. The current version of the website is based on the popular content management system WordPress. Relevant technologies: PHP, MySQL database, WordPress. Future updated versions of the website will extend the existing infrastructure and use more flexible web development frameworks like Laravel PHP to better support advanced usage scenarios.

SOPs4RI's website: brief description

The 1st version of SOPs4RI's website was launched on the 24th of February 2019 and all content can be reached by scrolling down. This option was chosen, since at this early point of the project's timeline, there is not a large volume of information to be communicated. NTUA, in cooperation with AU, decided to refrain from adding pop-up menus and keep the website as simple as possible, in order to spread the word of the project's basic objectives, key concepts, vision, challenges and mission as efficiently as possible.

SOPs4RI's Social Media sites: brief description

SOPs4RI's Social Media dissemination channels are Facebook, Twitter and LinkedIn. Snapshots of the above sites are shown below in figure 1.

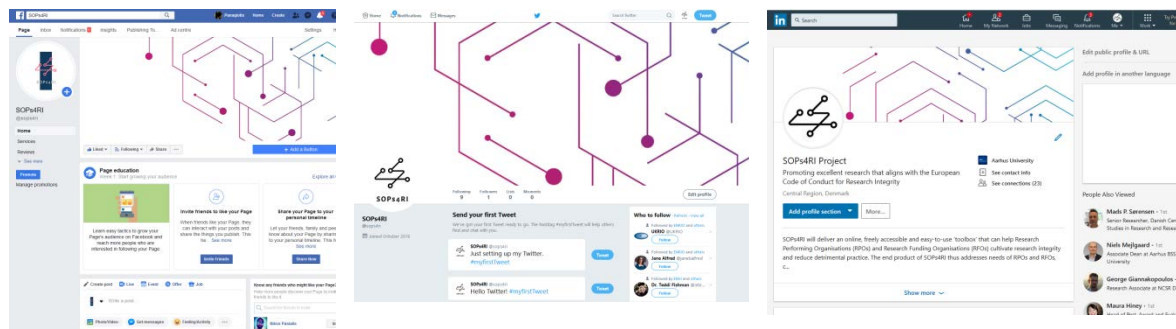

Figure 1: SOPs4RI's Facebook (left), Twitter (middle) and LinkedIn (right) pages.

Currently, one month after the initiation of online dissemination activities, SOPs4RI's Twitter account has 147 followers and is following 1917 accounts.

SOPs4RI's website: next steps

At the end of the project, the website will focus more and more on 'the Toolbox', which is going to be the cardinal deliverable of SOPs4RI. Additionally, NTUA in close collaboration with the coordinators will study the most effective way to integrate the website with the infrastructure of SINAPSE.
